SUMMARY

I'm a React Native and Full Stack Developer with 4+ years of experience building cross-platform mobile apps and web platforms. I specialize in React Native, Expo, Next.js, Firebase, Supabase, and Node.js — delivering production-ready iOS and Android apps for clients globally.

TECHNICAL SKILLS

Languages: JavaScript, Typescript

Frameworks / Libraries: React, React Native, Expo, ignite, Amity, Firebase, Supabase, RevenueCat, Node.js, Express.js, MongoDB, PostgreSQL, Context API, Redux, Redux Toolkit, Jest, Detox, Axios, GraphQL, REST APIs

Tools: Git, GitHub, GitLab, Bitbucket, Postman, XCode, Android Studio, VS Code, Cursor, EAS Build, CI/CD, App Store Connect, Google Play Console

EXPERIENCE

MERN Stack / React Native Developer

Dec 2023 – Present

Concept Recall

Karachi, Pakistan

- Built Ancient Remedies — a wellness app with 500+ remedy recipes, AI chat, and RevenueCat subscription flows.
- Developed IIFYM App with GraphQL, multilingual support, and subscription management.
- Built Afrotech Connect with Amity SDK chats and Firebase notifications.
- Upgraded Harvest Engine from React Native v0.63 to v0.75.4 New Architecture.
- Developed M50 App — toll payment system with Payzone integration and PDF invoice export.
- Wrote Detox E2E test cases for WoddleBabyInc BLE connectivity and growth tracking features.
- Implemented Agile methodologies using JIRA, Confluence, and Git for collaboration and version control.
- Managed App Store Connect and Google Play Console submissions using EAS Build.
- Tech Stack (Mobile): React Native, Typescript, Redux
- Tech Stack (Back end): Node js, Express.js, MongoDB, PostgreSQL

Front End Developer (Remote)

Feb 2023 – Dec 2023

Jobit Technologies

Karachi, Pakistan

- Developed and maintained React Native and Next.js applications for clients.
- Built responsive and interactive user interfaces using Nativewind(Tailwind) CSS.
- Tech Stack: Next.js, React Native, TypeScript, NativeWind CSS

Full-stack Developer

Jun 2022 – Dec 2022

SoftAppsio

Karachi, Pakistan

- Built marketplace platform using MERN stack with real-time features via Socket.io.
- Implemented HLS/DRM encrypted URLs for secure media streaming.
- Built React Native mobile apps with TypeScript and Redux.
- Tech Stack: Next.js, React.js, React Native, Redux, TypeScript, Tailwind CSS, Ant Design, Node.js, Express.js, MongoDB

Full-stack Developer

Jun 2021 – Jun 2022

Panacloud Pvt Ltd

Karachi, Pakistan

- Developed full-stack web apps using React, Node.js, and Express.js.
- Designed and implemented responsive HTML email templates optimized for cross-client compatibility.
- Collaborated with clients, designers, and project managers for timely delivery.
- Refactored existing codebases to improve performance and maintainability.
- Tech Stack: React JS, JavaScript, TypeScript, Node.js, Express.js, EJS templates

Frontend Intern (React JS)

Feb 2021 – May 2021

Jawan Tech Pakistan

Karachi, Pakistan

- Developed a Quiz Application with React.js and Firebase, implementing features for quiz-taking, progress tracking, and personalized feedback.
- Created responsive web designs using HTML5, CSS3, and modern JavaScript (ES6+).
- Integrated Firebase for real-time data storage and backend functionality.
- Collaborated on cross-browser compatible and responsive web applications.
- Applied Agile methodologies throughout the development lifecycle.
- Tech Stack: React JS, JavaScript, Firebase (Authentication, Realtime Database)

EDUCATION

Virtual University of Pakistan

Karachi, Pakistan

Bachelors in Computer Science

Present

Aptech Computer Education

Karachi, Pakistan

Diploma in Software Engineering

2019

PROJECTS

Ancient Remedies | *Expo (React Native), Expo Router, Supabase, RevenueCat, Mixpanel*

- Built a cross-platform wellness app with tab-based navigation using Expo Router.
- Integrated RevenueCat for paywall, subscriptions, entitlement checks, and restore flow.
- Built account deletion with platform-specific RevenueCat and subscription cleanup logic.
- Integrated Supabase Auth (email, Google, Apple) with shared profile API helpers.
- Implemented biometric login, secure credential storage, and onboarding with plan gating.
- Implemented Shopify book purchase → 30-day premium grant flow via Supabase Edge Functions.
- Configured Apple S2S notifications and Google Play webhooks for real-time subscription sync.
- Android: play.google.com/com.bublishing.ancientremediesmobile
- IOS: apps.apple.com/us/app/ancient-remedies

Afrotech Connect App | *React Native, Firebase, Amity SDK*

- Built community features with post creation, mentions, reactions, and threaded comments.
- Implemented 1-to-1 and group chats with media/document sharing using Amity SDK.
- Designed a customizable notification system for real-time alerts (reactions, messages).
- Integrated Firebase Auth/Firestore for secure user profiles and data storage.
- Optimized performance for high-traffic feeds and chats.
- Android: play.google.com/com.afrotech
- IOS: apps.apple.com/us/app/afrotech-connect

WoddlebabyInc App | *React Native, Bluetooth Low Energy (BLE), Detox*

- Wrote Detox E2E test cases for BLE connectivity and growth tracking features.
- Ensured app reliability across multiple Android devices through end-to-end testing.
- Android: play.google.com/com.woddle
- IOS: apps.apple.com/us/app/woddle-baby

Harvest Engine App | *React Native (v0.63 → v0.75.4 Upgrade)*

- Upgraded legacy farm management app to React Native's New Architecture.
- Migrated dependencies (Gradle 8.x, CocoaPods 1.14) and fixed breaking changes.
- Maintained chemical tracking and compliance logs during transition.
- IOS: apps.apple.com/us/app/harvest-engine
